FEATURES

- Zirconium dioxide (ZrO₂) sensing elements
- Long life, non-depleting technology
- Integral heating element
- High accuracy
- Requires an external interface board to operate

OUTPUT VALUES

- Oxygen pressure range: 2mbar—3bar max.
- Accuracy: 5mbar max.
- Internal operational temp: 700°C
- Response time (10—90% step): < 4s
- Warm up time (prior to sensor operation): 100s
- Warm up time (from standby): 20s
- Output stabilisation time: ~ 180s

BENEFITS

- No reference gas required
- No need for temperature stabilisation
- Flange mounting

TECHNICAL SPECIFICATIONS

- Heater voltage:
  - Operating: 4.35VDC ± 0.1VDC (1.85A)
  - Standby: 2VDC (0.85A)
- Pump impedance at 700°C: < 6kΩ
- Permissible gas temperature: -100°C to +250°C
- Gas flow rate: 0—10 m/s
- Repetitive permissible acceleration: 5g
- Incidental permissible acceleration: 30g
- Termination: 0.4m cable with Molex connector

- Other sensor options available on request, email: technical@sstsensing.com

NOTES

- Interface board sold separately; contact technical@sstsensing.com for details.
- It is important to measure the heater voltage as close to the sensor as possible due to voltage drops in the supply cable. Heater can also be operated with an equivalent AC or PWM signals.
- The constant current source used in the pump circuit should be designed to drive a load of up to 6kΩ.

**ORDER INFORMATION**

Specify the part number below when ordering.

O 2 S - F R - T 5

**CAUTION**

Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements. Carefully follow all wiring instructions. Incorrect wiring can cause permanent damage to the device. Zirconium dioxide sensors are damaged by the presence of silicone. Vapours (organic silicone compounds) from RTV rubbers and sealants are known to poison oxygen sensors and MUST be avoided. Do NOT use chemical cleaning agents. Failure to comply with these instructions may result in product damage.

**INFORMATION**

As customer applications are outside of SST Sensing Ltd.’s control, the information provided is given without legal responsibility. Customers should test under their own conditions to ensure that the equipment is suitable for their intended application.

For detailed information on the sensor operation refer to application note AN0043 Operating Principle and Construction of Zirconium Dioxide Oxygen Sensors.
